

$$1. i A = \begin{pmatrix} 1 & 1 \\ 0 & 0 \end{pmatrix}, B = \begin{pmatrix} 0 & 0 \\ 1 & 1 \end{pmatrix}$$

$$i E B A \cdot C + C + C$$

2. 波
$$A \in M_n(C)$$
.
记时: $\cos A = \frac{1}{2}(e^{iA} + e^{-iA})$
 $\sin A = \frac{1}{2i}(e^{iA} - e^{-iA})$
由此证明: $\cos^2 A + \sin^2 A = I_n$.
3. 计算 e^{A}

 $(1) A = \begin{pmatrix} 1 & 0 & 2 \\ 0 & -1 & 0 \\ 0 & 4 & 2 \end{pmatrix} \begin{pmatrix} 2 \\ A = \begin{pmatrix} 0 & -a \\ 0 & 0 \end{pmatrix}$

4 12 A EMn(C), * PAGSTS/13 (提示: 求eA的特征值和A特征值 关系) 关系)
5. 计算 Sin(C^{CIn}) \$10 cos(C^I)

其中 C + 0.

6. TRAEMICI, A的特征值模长均<1

TEHI: Lim AK = 0
